About RRM Academy

RRM Academy is the leading educational platform for patients and professionals seeking to understand and apply Restorative Reproductive Medicine (RRM). As the primary educational project of the Restorative Reproductive Medicine Foundation, a 501(c)(3) non-profit, our focus is entirely on education for true healing.

Guided by the expertise of our founder, Dr. Naomi Whittaker, and a community of RRM-trained professionals, we provide evidence-based tools to find the root cause of health issues and restore the body to its natural, healthy function.

RRM Academy is the leading educational platform for Restorative Reproductive Medicine, a medical approach that identifies and treats the root causes of reproductive health conditions rather than suppressing symptoms. A project of the Restorative Reproductive Medicine Foundation, a 501(c)(3) non-profit, RRM Academy provides clinician-led courses, a free research library of 3,100+ publications, and patient empowerment resources. Learn more at rrmacademy.org.

Mission Statement

Our mission is to provide expert-led, evidence-based education that empowers both patients and healthcare professionals to pursue a new model of care, one that seeks to find and treat the root cause of health issues.

What is Restorative Reproductive Medicine?

Restorative Reproductive Medicine (RRM) is an approach within conventional medicine that works cooperatively with the body. It uses standard and advanced diagnostic tools to investigate the fundamental “why” behind symptoms. By identifying and treating the underlying cause, whether hormonal, anatomical, or inflammatory, we can restore natural function and optimize health.

While our work is primarily focused on women, the RRM model also provides powerful solutions for men seeking to improve their reproductive health. This is not about symptom suppression; it’s about authentic healing.

The RRM Approach

- 1 **Identify the cause.** Your body’s signals, the painful periods, the irregular cycles, are clues that have likely been ignored. We teach you how to chart your cycle, turning your experiences into valuable data. For a NaPro-trained OB/GYN, that chart is like an EKG for a cardiologist; it helps uncover the root cause of your health issues.
 - 2 **Treat the condition.** Once we know the why, we can discover targeted medical and surgical treatments that address the underlying disease. If you have endometriosis, the goal isn’t just to manage the pain; it’s to skillfully resect the disease itself.
 - 3 **Restore normal function.** The ultimate goal is to restore your body’s natural hormonal balance and reproductive function. A healthy system is a fertile system. This approach can lead to improved fertility and healthier pregnancies because we’ve fixed the broken pipe instead of just using buckets to catch the leak.
 - 4 **Cooperate with the body.** RRM works in harmony with your natural cycle. You will learn to understand and appreciate your body’s intricate design, becoming an active, empowered partner in your own healthcare journey.
-

Conditions & Focus Areas

RRM Academy provides education on the root-cause diagnosis and treatment of:

Endometriosis

PCOS

Infertility

Recurrent Miscarriage

Postpartum Depression

Hormonal Imbalances

Painful Periods

Irregular Cycles

Chronic Pelvic Pain

Programs & Services

RRM Academy bridges the gap between complex medical science and the people who need it most:

- **Clinician-Led Courses:** Developed and taught by medical experts, translating years of clinical experience into accessible, self-paced online education with video lectures, downloadable resources, and transcripts.
- **Patient Empowerment:** Equipping individuals and couples with the knowledge to understand their bodies, ask informed questions, and advocate for better care.
- **Professional Training:** Resources for healthcare providers who want to integrate restorative principles into their own practices.
- **Evidence-Based Resources:** From in-depth masterclasses to an extensive research library, all content is grounded in scientific evidence and clinical best practices.

Course Offerings & Community

Masterclass in Endometriosis & Surgery

Long Term Endometriosis Management

Postpartum Depression & Anxiety: A Restorative Approach

RRM vs Standard ART: A New Approach to Infertility

Community & Support

- **Save the Uterus Club:** The foundation's membership community and primary fundraising arm. Members fund education that reaches over one million people monthly, professional training in restorative medicine, and advocacy for a healthcare model where surgery is never offered without investigation and painful periods trigger diagnosis, not dismissal. 100% of donations go directly to the foundation's operating fund.
- **RRM Research Library:** A free, AI-enhanced library of 3,100+ peer-reviewed research publications on restorative reproductive medicine. Every record is enriched with complete metadata from PubMed, CrossRef, and OpenAlex, and AI-classified across three dimensions: RRM relevance, evidence weight, and research domain. Citations are auto-generated in APA, Vancouver, and MLA formats. 330+ papers are tagged as open access.

Leadership

Naomi Whittaker, MD, OBGYN, MIGS

BOARD CHAIR & CHIEF MEDICAL DIRECTOR

Dr. Naomi Whittaker is a board-certified OB/GYN with a Focused Practice Designation in Minimally Invasive Gynecologic Surgery (MIGS). Her clinical focus is root-cause diagnosis and treatment for infertility and gynecologic disorders, with surgical expertise in excision of endometriosis, microsurgical tubal repair, and fertility-sparing laparoscopy. She founded RRM Academy out of a conviction that every woman has the right to understand her body and receive care that aims for true restoration.

Brian Whittaker

BOARD TREASURER & ACTING EXECUTIVE LEAD

Brian Whittaker has worked in women's healthcare marketing since 2015. He manages the foundation's overall operations, implements strategy, and oversees RRM Academy. He built and maintains the RRM Research Library, a collection of over 3,100 academic publications on restorative reproductive medicine. Brian is a U.S. Army National Guard Infantry veteran.

Quotes from Dr. Whittaker

“Women have the right to know how their bodies function. With this knowledge, women and doctors can work together to identify issues earlier, use medicine to restore health and fertility, and improve quality of life and health of women for their entire lifespans.”

Dr. Naomi Whittaker, MD

“This approach brings us to a model that supports listening to women, which leads us to a diagnosis. A diagnosis is the gateway to healing, restored health, and fertility.”

Dr. Naomi Whittaker, MD

“I have yet to have an unexplained infertility patient.”

Dr. Naomi Whittaker, MD, on always finding root causes

Frequently Asked Questions

Is RRM evidence-based?

Yes. RRM is grounded in conventional medical science. It uses standard and advanced diagnostic tools, including hormonal panels, imaging, and surgical evaluation, to identify root causes. The RRM Research Library contains over 3,100 peer-reviewed publications supporting this approach.

Is RRM the same as natural family planning?

No. While RRM uses cycle charting as a diagnostic tool (similar to how a cardiologist reads an EKG), it is a full medical and surgical discipline. RRM includes hormone therapy, minimally invasive surgery, and other conventional treatments, all aimed at restoring the body's natural function.

How does RRM differ from IVF?

IVF bypasses the reproductive system to achieve pregnancy. RRM investigates why conception isn't happening, treats the underlying condition, and restores normal fertility. Published data shows RRM achieves a 32.1% adjusted live birth rate across all age groups, and 27% for women over 40, compared to IVF's 9% in that age group.

Do I need to be religious to benefit from RRM?

No. While NaProTECHNOLOGY (a specific type of RRM) was developed at a Catholic institution, the approach is entirely scientific and medical. RRM Academy serves patients and professionals of all backgrounds.

What is NaProTECHNOLOGY?

NaProTECHNOLOGY (Natural Procreative Technology) is a specific and highly effective form of RRM developed by Dr. Thomas Hilgers. It combines standardized cycle charting with targeted medical and surgical interventions to diagnose and treat reproductive health conditions at their source.
